

We take care of people

At the Cahill Group, people come first. We put the safety of our people above all and are committed to providing a healthy and safe work environment.

HSE Management System

Cahill's HSE Management system is based on OHSAS 18001 and incorporates industry best practices to ensure our employees abide by the most current and stringent safety requirements. We work with our clients, employees, and key stakeholders to address project based or site specific requirements.

To control occupational health and safety risks at Cahill, we focus on incident prevention, safety promotion and continuous improvement. We achieve this through employee education and training, implementation of robust safety policies and procedures, observational safety reporting and employee involvement with established Occupational Health and Safety (OHS) Committees.

Safe Steps

Cahill is committed to ensuring that each employee returns home to their family unharmed. We communicate and continually reinforce this commitment through Safe Steps, the platform by which the Cahill group promotes a positive safety culture in support of our HSE Management System.

Safe Steps is built on five critical pillars:

- Leadership
- Consistency
- Accountability
- Communications
- Training
